SUBJECT INDEX

Abacus 690
Ability and achievement 169
  National Assessment in Science 216, 222
Ability grouping, achievement outcomes 198
Abrami, P. C. 270, 272, 320, 333
Abstraction 633
Academic discipline, student's ratings 325
Acceleration programs 159
Access and availability of knowledge 642
Accretion 520
Accuracy standards 127, 129, 131
Achievement
  educational productivity 147
  measurement 418
  meta-analysis 193
  National Assessment in Science 213
Acquisition and transfer of knowledge and cognitive skills 603, 707
  ecological knowledge 665
  learning 608
  mathematics 687
  mindfulness 623
  problem-solving model 607
  socializing knowledge transfer 639
Action research 568
Active construction of knowledge 689
Adaptive instruction 159
Addition 695
Administrators 407
Advance organizers 159, 205
Affective characteristics and achievement, meta-analysis 203, 206
Affective entry behaviours 189
Affective objectives 34
After-hours schools 431
Aleamoni, L. M. 341
Algebra 698
Alternative learning opportunities 430
American College Testing scores 418
Analogical reasoning in relation to transfer 644
A Nation at Risk 454, 456
Anchor Test 417
Application of trained skills 522
Applicability paradigm, students' evaluation of teaching effectiveness 351
Appropriate transfer 645, 649
Aptitude, model of educational productivity 150, 156
Artificial intelligence 641
Assessment, Netherlands 504
Association theory 608
Attitudes, science 179
  National Assessment in Science 213
  transfer 650
Australia, applicability of North American student ratings 351
Automaticity 625, 630
  mathematics 693
Autonomous learning 161
Availability of knowledge 642

Background characteristics, students' evaluation of teaching effectiveness 305
Basic data, NCES 397
Basics curriculum 407
Behavioural objectives 33
Behaviour
  nonverbal, teacher training 589
  pupils, effect of protocol materials 549
Behaviour modification, microteaching 537
Betting model of evaluation 111
Bias in student evaluations 305, 309
Bloom's model of student learning 188
Borg, W. 546, 549, 550
Braskamp, L. A. 280, 302, 337
Braunstein, D. N. 346
Bridging instruction, transfer 652, 657
Broader goals of education 27
Broad-scope objectives 34, 39

Cadwell, J. 273
Campbell/Fiske criteria 360
Canada, alternatives for a national data system 507
Career choices, science 181
Carroll's model of student learning 188
Centra, J. A. 340, 345
Citizenship 422
Clarity, teaching effectiveness 297
Class-average expected grades 317, 321
Class-average responses, reliability 275
Class environment, National Assessment in Science 224
Class size
  achievement outcomes 198
  SEEQ student ratings 314
Classroom climate, student performance in science 177
Cluster sampling 64, 67
Coaching, teacher training 526

Cognitive economics of transfer 649
Cognitive model for microteaching 537
Cognitive operations 34
Cognitive research, mathematics learning 687
Cognitive science 178
Cognitive self-management skills 653
Cognitive skills, transfer 707
Cohen, P. A. 289
Common Core of Data 397, 404, 444, 461, 473
Common elements theory 641, 646
Commons Dilemma 672
Communication 116
  nonverbal 589
Communities 470
Comparability, data collection 437
Comparability of effects 93
Comparison groups 49
Compensation 405
Computer-assisted learning 160, 204
Computer programming 641
Computers, role in promoting selective transfer 656
Conceptual instruction, teaching skills 524, 555
Conceptual intervention, teacher training 555
Conceptual versus procedural knowledge 692, 694
Confirmatory factor analysis, teaching effectiveness 271
Construction validity of causes or effects 52
Construct validation, teaching effectiveness 260, 285
Convenience sampling 61
Cooperative learning 159, 177, 199
Cost–benefit studies 432
Costs 25
Counting strategies 689
Course level, student rating 324
Course selection, student rating 322, 349
Criterion-referenced tests 36, 40
Cross-curricular problem solving tools 658
Cultural practices theory 647
Cultures of transfer thinking 655
Curriculum development, reflective teaching 571
Curriculum materials, student outcomes, science 169
Curriculum process data 407

Data base, national 472, 480
Data collection, methodological and technical issues 435
Data gathering in educational evaluation 78
Data linkage 442
Data processing 441
Decision making 105, 658
  acquisition of ecological knowledge 681
  changing nature of 455
  incremental model 108
  rational model 106
  use of educational information 476
Decision-oriented evaluation 91, 105
Degrees of Reading Power 417
Demographic issues, achievement 421
Demonstration teaching 577
  planning model 522
  problems 581
  workshops 579
Derived fact strategies 695
Desegregation, achievement outcomes 198
Designs, evaluation 43
Development, access and availability 641
Dimensionality of students' evaluations 263
Dr Fox studies 331
Dropout rate 8, 421

Ecological knowledge, acquisition and use 665
Economic outcomes of schooling 428
Educational objectives 14, 31
  guidelines for evaluators 39
  measurement 36
  taxonomy 34
Educational outcomes 415
  achievement 418
  definition and measurement 416
  noncognitive outcomes 422
  relationship to processes 425
  retention and dropout rates 421
Educational personnel, standards for evaluation 139
Educational productivity, syntheses of research factors influencing learning 155
  model 150, 187
  national survey data in testing the model 213
  need for research 147
  practical implications 227
  science outcomes 165
  student learning models 187
  U.S. 148
Educational system, conceptual framework 469
Education data system redesign 389–513
  methodological and technical issues of data collection 435
  national data system 453
  outcomes 415
  process data 403
Effective schools 427
Effective teaching 428
Effect sizes 151
Effort 626
Elective/required courses 322
Employment, school effectiveness 429
Endeavor 266, 351, 380
Enrollment data 408
Enthusiasm, instructor 326, 331, 355
Environment
  model of educational productivity 150, 157, 161, 170
  model of student learning 199
  National Assessment in Science 224
Environmental-impact reports 22
Equilibrium theory 342
Equity 430
Ethnographic designs 50
Ethnography, teacher training 569

Evaluation
approaches that seek to enhance relevance 110
background to 3
decision oriented 91, 105
definition 8
designs 43
educational objectives 14, 31
educational personnel, standards 139
framework for 22
information and local school improvement 77
limitations 18
measurement, research and learner appraisal 10
models 21
reporting 115
role in educational process 13
sample design 57
standards 125
Execution of a program 25
Expected grades, student evaluation of teaching effectiveness 317, 318
Experimental designs 44
sampling 57
sources of invalidity 52
Ex post facto design 48
Expressive nonverbal behaviour, teacher training 592
Extenuating circumstances 305
External validity 52
Extracurricular activities 431

Facilities/equipment, student outcomes, science 170
Factor analysis, students' evaluation of teaching effectiveness 265
Faculty self-evaluation 293, 318
Feasibility standards, 127, 129, 130
Feedback, student ratings of teaching effectiveness 338
Feedback in teacher training 525
microteaching 535
Feldman, K. A. 299, 314, 323, 324
Finance data, NCES 399
'Fishing Conflict Game' 672
Follow-up procedures 28
Formative evaluation 10
Frey, P. W. 266, 267, 351
Functional Table of Contents 134, 135

Gage, N. L. 345
Gender, achievement 168, 203
National Assessment in Science 224
Generalizability, teacher and course effects 277, 281
Generalization, teacher training 522
General tendency, mindfulness 627
Gilmore, G. M. 279
Glaser's model of student learning 191
Glass, G. V. 314
Gliessman, D. 551, 557

Goals
decision making 107, 108
science education 172
Grading satisfaction hypothesis 290, 321
Guidelines for educational evaluators 39

Higher Order Questioning 534
High road/low road learning and transfer 630, 709
High School and Beyond 419, 423
Home environment, educational productivity 161, 170
National Assessment in Science 224
Homework, educational productivity 161, 204, 223

Implicit theories, teacher behaviours 272
Income, education impact 423, 429
Incremental model, decision making 108
Individualization, achievement 204, 208
Informal learning 431
Information, evaluation for local school improvement 77
Information gathering 21, 78, 85
Information overload 85
Initial status of learners 23
Inquiry-oriented teacher education 566
Inservice teacher education, student achievement 200
Instruction
model of educational productivity 150, 157
model of student learning 187, 200
National Assessment in Science 216, 223
organization 409
process data 409
social context 411
Instruction methods, student outcomes, meta-analysis 203
Instruction time, achievement 160
learning model 188
National Assessment in Science 223
Instructional objectives 32
Instructional rating dimensions 265
Instructional resource exposure, science education 176
Instructional technology, achievement 204
Instructional Theory Into Practice workshops 579
Instructor and Course Evaluation System 383
Instructor enthusiasm, student ratings 331
Instructor factors, student outcomes, meta-analyses 199
Instructor personality, student rating 326, 331
Instructor rank, student rating 323
Instructor self-evaluation 293, 343
Intellectual development, science education 178
Intelligence 610, 711
transfer 645
Interactional Improvisation Method 595
Interactive Decision Envisioning Aid 657
Internal consistency 275
Internal validity 52

International comparisons of achievement 419, 439
Intervention, teacher training 555, 557
  demonstration 578

Japan, achievement scores 148
Judgement sampling 61

Keller-Plan 159
Kleucker, J. 547
Knowledge
  acquisition and use 665
  links among domains 692
  role in teacher training 520
  utilization 642

Laboratory activities, achievement 201
Land, M. L. 297
Learner appraisal 11, 14
Learner performance after instruction 24
Learners, initial status 23
Learning
  aptitude effects 156
  behaviours, science education 174
  environmental effects 157
  experiences 14
  instructional quality and time 157
  low road/high road 630, 709
  mathematics 687
  mindfulness 624, 629
  spectacular 651
  student outcomes, meta-analysis 204
  syntheses of research on influencing factors 155
  transfer 607, 610
Learning Environment Inventory 177
Learning models, meta-analyses 187
  assessment of factors in 193
  Bloom 189
